I am a third-year Informatics Engineering student at Telkom University Purwokerto, with a strong interest and solid foundation in SQL and web development. Throughout my studies, I have actively participated in various web-based application development projects, both individually and as part of a team. I have contributed to the creation of Company Profile Websites and E-Commerce platforms, involved in the planning and coding processes. Recently, I was once again entrusted to work on similar projects with my team, which has further honed my skills in collaboration, problem-solving, and time management. I am enthusiastic about continuing to learn and ready to give my best contribution during my internship.

EDUCATIONAL

Telkom University Purwokerto   **2022 - Present**
Informatics Engineering

EXPERIENCE

Big Task Design SQL Database System   **December 2023 - January 2024**
Telkom University Purwokerto
Design and implement a SQL database system to improve the data management process, facilitate data retrieval, and ensure data integrity for borrowing books at the Telkom Purwokerto Vocational School Library.

Achievement:
- Successfully designed a scalable database capable of handling 20 book borrowing and returning transactions per day.
- Reducing book and library member data retrieval time through effective indexation and query optimization.
- Achieve zero data loss during the migration process, ensuring a smooth transition from legacy systems to new systems.

Web Development Project Website of Curug Pletuk   **September 2023 - December**
Telkom University Purwokerto   **2023**
Design and implement a website for Curug Pletuk Banjarnegara using WordPress to increase visibility and tourist attraction.

Achievement:
- Successfully launched an attractive and informative website, increasing the number of tourist visits to Curug Pletuk.
- Increase online visibility and website SEO ranking, attract more visitors through organic search.
- Providing an easy-to-manage platform for the Curug Pletuk team to update content and information independently.
